Projects

- ❖ **Smart Industrial Motor Protection & Predictive Maintenance System**
 - Designed an ESP32-based system for monitoring motor conditions.
 - Implemented real-time monitoring for voltage, current, and temperature.
 - Developed a fault detection system for early failure detection.
 - Created a web-based monitoring dashboard using IoT technology.
- ❖ **Smart Industrial Safety System using ESP32**
 - Developed an IoT-based industrial safety monitoring system using ESP32.
 - Integrated sensors to detect hazardous conditions in industrial environments.
 - Implemented real-time monitoring and alert system for worker safety.
- ❖ **Water Quality Monitoring System using ESP32**
 - Developed an IoT-based water quality monitoring system using ESP32.
 - Measured pH level, temperature, and water clarity using multiple sensors.
 - Displayed real-time data on OLED display and web interface for remote monitoring.
- ❖ **PLC Based Automatic Bottle Filling System**
 - Designed and simulated an automated bottle filling process using PLC.
 - Implemented ladder logic programming for industrial automation.

Achievements

- 2022
Invention Competition – Participant
Presented an innovative project in a school-level invention competition.
St’ Aloysius College, Rathnapura.

Technical Skills

- **Programming**
 - Arduino Programming
 - Embedded Systems Programming
 - Ladder programming
- **Hardware & Platforms**
 - ESP32
 - Arduino
 - Sensors and Actuators
 - Motor Control Systems
- **Software Tools**
 - Proteus Simulation
 - AutoCad
 - Solid Works
 - Microsoft Office

I hereby certify that the information given above is true and accurate to the best of my knowledge.
